

# Offering life saving treatments for heart failure

## RESEARCH, ECONOMIC DEVELOPMENT AND ENGAGEMENT AT ECU

The impact of ECU research extends well beyond our campus. Faculty and students are developing new technologies, medicines, and innovative approaches that will transform the rural and coastal regions of our state and in communities around the globe. As the only university in North Carolina with a medical school, dental school and college of engineering, ECU is leading the way to create important discoveries that result from collaboration across the university and with partners in industry, government, nonprofits and communities.
